

Works of Art for Your Home

Heliarc-Welded Storm Doors

FOX Aluminum
Products
Inc.

WELDOOR®

The Art of Design

Beautiful. Functional. Durable. If you could design the perfect storm door, you would start with those three requirements. Then, you would add classic styling, use the best materials, build in long-lasting quality features, and provide the most advanced finish. In short, you would create a Fox Weldoor™.

Years of testing and product refinement have gone into the development of the Fox Weldoor, making it one of the Midwest's best-selling brands. That gives you the freedom to choose any door from our extensive collection with complete confidence.

Take the smart approach. Begin with a review of the Fox Weldoor construction features that ensure

years of reliable performance. Take special note of:

- Heliarc-welded corners
- Interlocking hinges
- Heavy aluminum screens
- State-of-the-art finishes

Select from our assortment of models and colors. Complete your work of art with our special hardware and trim options. Whether traditional, contemporary, elegant, or informal, Fox Weldoor has the style and color that is right for you. We create works of art that personalize your home.

On our cover: 21-08 in Wicker with Borderlite Glass, Brass Inset Panel, Brass Pull Handle

The Art of Color

Nobody does it better.

Fox Weldoor offers a rich palette of colors to complement your decorating scheme. Our powder-coating system is one of the most advanced in the U.S. today. Whether you choose a classic color or a new designer shade, you will enjoy years of durable beauty.

Our secret to success is our process. We begin with a thorough cleaning/pretreatment process; then electrostatically apply a heavy coating of durable resin – oven cured on our automated line. This beautiful finish is three times heavier, harder, more durable, more fade resistant, and more environmentally friendly than conventional solvent-based paints. We revel in the Art of Color.

Self-Storing Doors

Discover the convenience of self-storing doors. Our popular self-storing models allow you to change ventilation by sliding the glass insert for seasonal conditions. Simply choose the top or bottom ventilation position. And as the seasons change, you can change from glass to screen – no need for removal or storage of panels.

The efficient slidelock design from Fox Weldoor has fewer moving parts, effectively reducing the need for repair.

A Word about Roll-up Screens: The Fox door is designed and manufactured to last the life of your home. Should it become damaged, it is easily repaired locally at a reasonable cost. This is **not** true of roll-up screens. Ask any supplier and they will confirm the cost and problems of roll-up screen repair.

At Fox Weldoor, we stand by the cost and convenience of our self-storing models to enhance our Art of Design.

The Art of Strength

For a door to be perfect, its strength must come from within its design. We call this design the Art of Strength. At Fox Weldoor, our designers

have incorporated a number of unique construction features that contribute to the overall beauty, functionality and durability of every door.

- **Heliarc-Welded Corners.** The screw-type corners on conventional doors are weak. With Fox Weldoor, the heliarc-welded corners become the strongest points overall, giving your door strength and durability. See our guarantee for details.*
- **The Fox Weldoor Hinge System** uses an exclusive, four-hinge, tubular design that interlocks into the door frame. Heavy steel pins hold bronze bushings in place for extra durability. Our hinge system is guaranteed not to fail.*
- **The Brush-Type, Adjustable-Bottom Weather Seal** from Fox Weldoor is similar to weather seals readily found on many commercial doors. With its non-shrink design, this weather seal costs a little more, but it will not bind, twist, or tear like traditional vinyl sweeps. It is definitely a value-added feature.
- **Safety Glass** is a must for every home, especially those where children live or visit. Every Fox Weldoor – even custom sizes – features tempered safety glass. Your family's safety is our concern.
- **Double-Door Treatments** can be tricky, but they need not be. Many companies supply makeshift hardware and brackets for double-door installation, but not us. Fox Weldoor has engineered a self-contained astragal system specifically designed for pair installation.

- **Heavy Aluminum Screens.** We do not use rolled aluminum, fiberglass, or plastic. Our screens are constructed of the finest quality aluminum. Our frames are made of extruded aluminum – twice as heavy as conventional frames. In addition, our frames feature solid aluminum corners and are fitted with non-glare screening for extra strength and rigidity.
- **Fox Weldoor Stamped Panels** offer you long-lasting durability and good looks. In fact, our panels are twice as heavy as most competitive products.
- **Dependable Hardware.** We use an adjustable hydraulic closer for smooth, non-jarring closing action. We also feature a fold-back wind strap (no noisy chains with Fox Weldoor). Our locks are selected for their durability and quality. And, all of our doors have a security deadbolt feature for your protection.

Please note: Storm doors are not recommended for a watertight enclosure and are not guaranteed watertight.

* For complete Lifetime Warranty details, see your Fox Weldoor distributor.

Fox Weldoor Hinge Test

Here's a fun fact. To test the strength of Fox hinges, we hung 200 pounds of weight from the test door at 36 inches from the hinge. This applies over 600 pounds of torque to the hinges. The Fox Weldoor swings without binding!

Fox was able to **remove** two center hinges and repeat the same test successfully – the door still performed as without a load.

At Fox Aluminum Products, development and testing never end!

WARNING! Do not attempt this test with any other competing product as total hinge and/or door failure is likely.

The Art of Selection

Harmony Series

After 50 years of success building great-looking, long-lasting storm doors, we decided to create an upscale new product for the 21st Century. It had to include all the strengths of our Classic line, plus offer additional durability and updated styling, while still providing beauty and value for homeowners. The result is now our most popular product, the Harmony 2100 series.

Finishing Touches

Sidelite Accents

When it comes to creating an elegant entrance, Style Matters. Accent the beauty of your entryway with sidelite panels of tempered safety glass in the style and color that will best complement your Fox Weldoor. With your Art of Choice, you can give your entryway that designer look.

Kick Plates

Another nod to your personal sense of style is the addition of Kick Plates to your entryway. You can expect a lifetime of service from Fox Weldoor Kick Plates. These door panels are dent resistant and constructed of high-performance, tempered, durable, anodized Aluminum. Our Kick Plates are available in a Brass tone or Satin finish, and are treated with a special coating to prevent tarnishing. Exercise your Art of Choice.

Handles

Every door made by Fox Weldoor comes complete with a durable, lockable handle. You may, however, want to customize your new door with an upgraded handle. Review our array of curly levers, trigger pulls, DSX levers, pushbutton handles and mortice handles, and choose the style and finish that best harmonizes with your new look.

Consult with your distributor for a full selection of options.

Curly Levers - offered in Oil-Rubbed Bronze, Black Chrome, White, Polished Brass Plate, and Satin Nickel

Trigger Pulls - offered in Satin Nickel, Antique Brass Plate, Oil-Rubbed Bronze, and Polished Brass Plate

DSX Levers - offered in Satin Nickel, Oil-Rubbed Bronze, and Polished Brass Plate, with matching Interior Paddle Handles

Interior Paddle Handles - offered in Black, Polished Brass Plate, Satin Nickel and White for all options excluding DSX Levers

Pushbutton Handles - offered in Brass, Antique Brass, White, Satin Nickel, and Black

Mortice Handles - offered in Solid Brass, Satin Nickel, and our newest color, Oil-Rubbed Bronze

The Art of The Perfect Door

At Fox Weldoor™, we offer you The Art of the Perfect Door because we know you only get one chance to make a first impression. In addition, we understand the importance you place on the appearance of your home. For those reasons, every product that you purchase for your home should add to its value and beauty. Contact your Fox Weldoor distributor today.
